tailored *to you*

Helen, our home manager, is passionate about ensuring all residents receive the best possible care from our highly trained staff teams. We review care needs on a regular basis, so care plans will always respect personal preferences, as well as medical and dietary needs.

RESIDENTIAL CARE

Some of our residents require only minimal levels of support but want the comfort and security of knowing care is on hand when they need it. Others are more dependant, with their needs being managed by carefully documented, person centred care plans. Whatever your circumstances, you or your loved one will be cared for by people you know and trust.

DEMENTIA CARE

At Walton Manor we provide 24 hour personalised care and assistance for those living with dementia and memory loss. Our staff are trained to support people living with different types of dementia, and they understand that each individual experiences this in different ways.

RESPITE CARE

Respite stays allow families and carers to have a well-deserved break whilst providing an often revitalising change of scenery for those being cared for. Others may require extra, short term support with rehabilitation following an operation or stay in hospital. No matter what your circumstances, a short stay with us offers the opportunity to make new friends and see what life at Walton is really like.

DAY CARE

You or your loved one can attend the home for a day, participate in the day's activities and make new friends. We're happy to discuss your circumstances and how we might be able to help.
